

Thursday 30th April 2020

Dear Families,

Welcome to Term 2!

My name is Miss Claudia and I am very excited to be teaching Room 30 this term. I am looking forward to a fun term filled with lots of new learning experiences. If you have any queries or concerns about your child and their learning please **contact me** using **Seesaw**, the school phone – **82624864**, or email Claudia.Zurcher913@schools.sa.edu.au.

This term our learning will focus on:

Writing – We will concentrate on Information Report writing, and the topic of 'Australian Animals'.

Word Study – We will focus on rules and patterns in spelling. Students will receive a new list of words to learn each week. Please encourage your child to learn the spelling and understand the meaning of words.

Sight Words - Students must practice their sight words by saying them aloud every day. This will help with developing language fluency.

all	am	are
be	but	came
did	do	get
good	have	like
must	please	pretty

Reading – I encourage students to practice their reading for at least **10 minutes every night** by using their readers and Reading Eggs. Each week the class will complete a **guided reading** program. The program will teach your child strategies which assist them in reading and understanding the text.

Library - The students will visit the library on **Wednesdays**. Please remember to bring library books back each week.

Numeracy- Multiplication, Division and Time will be our numeracy focus. Students are encouraged to practice their times tables at home.

The Arts- with Ms Ruth. Students will sing songs from various cultural sources, with a focus on breathing, pitch and meaning. In Drama, they shall recreate, develop scenarios and perform short plays.

Science - With Ms Lakra. Students will learn about the Life Cycles of humans and other living things.

P.E. - with Mr Polyak. Students will design and create their own games and obstacle courses using different equipment and develop their own rules, area of play, scoring systems and equipment list to develop a deeper understanding around games and sport.

Health- with Mrs Kathryn. Students will be examining how their body has grown and changed from when they were younger. They will be identifying important body parts and organs and exploring what some of them are used for. Students will also explore how we can take care of our body through eating a healthy and balanced diet.

Important dates-

School photos **4th May**

Public Holiday (Queen's birthday) **8th June**

Student Free Day **12th June**

Term ends on **Friday, 3rd July**

Kind Regards,

Miss Claudia
